

PREVENT DISEASES SPREAD BY RODENTS

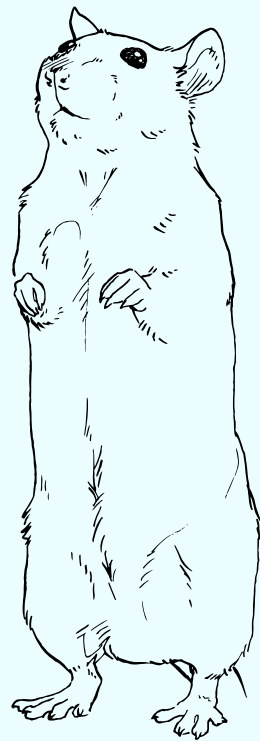

Rodents carry many diseases and may cause public health issues. The best way to prevent diseases spread by rodents is to practice effective rodent control in and around your home

S E A L U P

- Seal up to keep wild mice and rats out of your home.
- Look for gaps or holes inside or outside your home
- Maintain areas inside and outside to deter mice and rats

T R A P U P

- Trap rodents around the home to help reduce the rodent population.

C L E A N U P

- Prepare to clean up after rodents
- Clean up rodent urine and droppings
- Clean up dead rodents or rodent nests
- Clean up different types of spaces after rodents

*ALWAYS take precautions when cleaning to reduce your risk of getting sick.
